EDUCATION

Computer Science, Fairfield University, Fairfield, Connecticut

September 2019 — May 2023

Cristo Rey Brooklyn High School, Brooklyn, New York

August 2015 — June 2019

PERSONAL PROJECTS

Todo List App

A general to-do list application utilizing a React front-end with a python back-end. Developing the app also provided an opportunity to learn about Redux and global state management libraries.

Forecast App Remix

The first React app I was able to develop completely on my own. Powered by openWeatherMap's API, this app features a detailed 5 day forecast with the capability to convert between imperial and metric units.

Chat App

Another full-stack application that I developed mostly on my own. Using Firebase as a back-end, and leveraging React's Context API for authentication, I was able to make a small chat app with rooms.
